

UNREST IN THE MARKET.

Fluctuation In Price of Tobacco
Has Hit Dealers
Hard.

ASSOCIATION IS IN DOUBT.

Fate of the Planters' Organi-
zation To Be Settled
Sept. 21.

The decline in the price of tobacco in this district is causing serious losses to the dealers who bought at high prices in the loose state. So serious has the situation become that there is a move on foot among these dealers who still have tobacco to form an organization for their mutual protection. There is also a move to pool this tobacco with the Planters' Protective Association and have it sold through these channels.

From the best reports obtainable there are about 7,000 hogsheds of tobacco still unsold in the district, which is owned by independent dealers, or those who bought the tobacco loose and prized it themselves as a speculation, hoping to be able to sell at a profit. Of this amount probably 2,500 hogsheds are held here, 1,500 at Clarksville, 1,000 at Paducah and 2,000 at Mayfield. For this tobacco fancy prices were paid last fall and winter and now the market quotations in most instances are considerably less for the tobacco prized and after it has gone through the sweat than was paid for it at first.

Several conferences have been held between these independent dealers and officials of the Planters' Protective Association looking to a joining of interests. The association has between 5,000 and 6,000 hogsheds of the 1911 crop still on their hands which they are closing out as fast as they can at reduced prices. Nothing has been given out to the public from either side as to the progress that has been made towards a coalition between the association and the independent dealers, but just what the outcome of the negotiations will be cannot be foretold. That the independent dealers will form an organization of their own seems more probable, to hold the tobacco.

Whether or not the Planters' Protective Association will continue in existence for another season is yet to be determined. For the past two years only about one-third of the tobacco growers in the dark district have sold their tobacco through the association and now the officials have come out with a plain statement of facts and the positive declaration that unless at least a majority of the farmers affiliate with the organization for the next year, it will be allowed to dissolve and quit business entirely. The membership books will be financially closed for the 1912 crop on September 21, and the final decision will be made on the showing made at that time. The officials of the association have repeatedly stated their position in public speeches and through cards published in the newspapers, and they declare they mean exactly what they say.

The effect of this has been to create more interest in some sections, but whether or not the farmers generally are interested sufficiently to join and raise the membership to the required status, is another matter that only the future can determine. The association was formed in 1904. It has controlled as high as 65,000 hogsheds of tobacco in a single year, this year their holdings being about 12,000 hogsheds.

Hobson Is Happy.

By a compromise effected between battleship and no-battleship Democrats in the House, provision will be made in the naval appropriation bill for one super-dreadnought.

DON'T GO WEST

Consumptives Hopelessly Ill Ad-
vised to Stay at Home.

Physicians in all of the eastern and southern states will be asked by the National Association for the Study and Prevention of Tuberculosis to stop sending consumptives in the last stages of tuberculosis and without sufficient funds to the southwestern part of the United States in search of health, according to a statement made by that association.

While it is impossible to tell accurately how many consumptives there are at present living in the states of Colorado, New Mexico, Arizona, Southern California, and Western Texas, it is probable that no less than 10 per cent of the 6,000,000 people in this territory have tuberculosis themselves or have come to the West because some member of their family has had it. Every year the health authorities estimate, not less than 100,000 consumptives hopelessly diseased come West to die. For these cases the climate of this section of the country can do nothing and they are compelled to die in strange surroundings and thousands of miles from home and friends.

The National Association points out further that from 50 to 60 per cent of these advanced cases are too poor to provide the proper necessities of life and they are either starved to death or compelled to accept the meagre charity which this part of the country affords.

In an effort to stop the migration of consumptives of this class to the Southwest, the National Association will ask physicians to be more careful in ordering patients to go away, and will also ask railroads to discontinue their practice of selling "charity" tickets to those who cannot afford to pay full fare. "No consumptive should go to Colorado, California, or the West for his health," says the association, "unless he has a good chance of recovery from his disease, and especially unless he has at least \$1,000 to spend for this purpose, over and above what his family may need."

"Tuberculosis can be cured in any part of the United States, and it is not necessary for a tuberculosis patient to go West. Whenever possible, the National Association urges tuberculosis patients who have not ample funds to go to a sanatorium near home, and if they cannot do this, to take the cure in their own homes, under the direction of a physician."

EVERY COUNTY

Will Have A Little Sapling Of
Its Own.

Frankfort, Ky., Aug. 12.—The Capitol Committee has selected H. F. Hillenmeyer and Prof. H. Garman of Lexington and the State Forester, who has not been appointed, as a committee to superintend the planting of trees on the grounds of the new capitol.

Each county in the State will be asked to send one tree to be planted and the committee will decide upon where the trees are to be planted. Prof. Carroll, road engineer, was instructed to lay out the driveways at the rear of the capitol.

NEW AVIATOR

To Handle Judge Prowse's Bi-
planes In Exhibition Flights.

A new aviator, a young man named Gray, arrived here last week to consider a contract with Judge Prowse for flying his biplanes for exhibition purposes. Preliminary tests were made Saturday morning at the aviation field, but no high flights were made. Mr. Shepherd, who has worked on the machines of late, will be Judge Prowse's mechanic in the future. Both machines are now in good repair.

1000 LIVES

Lost By the Earthquake In
Turkey Last Week.

Constantinople, Aug. 12.—Reports
here indicate that the great earth-
quake which was felt through a
large part of Turkey was accom-
panied by much heavier loss of life
than at first was stated. The news-
papers today estimated the number
of victims at a thousand killed, while
the injured are said to number from
five to six thousand.

MRS. BONTE'S SISTER

Died Sunday From Injury Re-
ceived By a Fall.

Mrs. W. Bonte received Sunday a
telegram advising her of the death
of her sister, Mrs. William Lothman,
at Minneapolis, Minn. Mrs. Loth-
man was in the 75th year of her
age. Her death was due to a fall she
received two years or more ago by
which one hip was broken and her
death was not unexpected. She is
survived by two sons.

Rhea To Contest.

John S. Rhea, of Russellville, who
was a candidate for the Democratic
nomination for Congress in the
Third District, is in Louisville and
announced last night that he would
contest the nomination of R. Y.
Thomas. On the face of the returns,
Mr. Thomas received a majority of
247 and will be awarded the certifi-
cate of nomination.

Mr. Rhea claims, however, that
fraud was resorted to and that there
were many irregularities in connec-
tion with the primary. He claims
that he has information that leads
him to believe that ballot boxes were
stuffed and that false returns were
certified by some of the primary
officials.

Mr. Rhea says he is determined to
see the inside of the ballot boxes
and for that reason will institute a
contest as soon as Thomas has re-
ceived the certificate of nomination.

CHICKEN THIEF RECORD

Negro Steals 1,000 Birds In
Three Months Time.

Rome, Ga., Aug. 12.—1,000 stolen
chickens in three months is the re-
cord of Henry Richardson, a negro,
of this city. He told the police that
his income from the fowls during
that time had averaged \$100 a month.

The negro, who made a full con-
fession to the police, said that he
would steal as many as fifty chickens
in a night. He dressed them in the
day time, then sold them at just e-
nough reduction under the market
price to have no difficulty in dispos-
ing of them.

Richardson was arrested yester-
day. Many persons had stopped
raising chickens on account of his
persistent thefts.

NIGHT-RIDER CASE.

Last Scene In Legal Battle En-
acted When The Plaintiff
Was Paid.

Nashville, Tenn., Aug. 12.—Last
week marked the close of the cele-
brated Robertson County night rider
case of Thomas Meneses against thirty
of the most prominent and prosper-
ous farmers of the Black Patch
country, when the attorneys for the
plaintiff and defendants gathered at
the office of the United States Mar-
shal and had a full settlement of the
case, according to the order of Judge
E. T. Stanford, who presided during
the trial of the case at the October
term of Federal Court in 1911. The
amount paid by the defendants was
\$9,792.98. Of this amount, \$7,733-
90 was the final judgment in the
case, and \$1,757.31 costs, the balance
being interest accrued and costs
since the judgment was given. The
defendants named in the judgment
were as follows: J. T. Matthews, W.
H. Farmer, R. S. Holloway, James
Smith, H. E. Montgomery, Gus Stan-
ford, James C. Stanford, Clayton
Bailey, W. Sandy Cobb, Henry Mil-
ler, E. B. Boyd, J. E. Winters, S. S.

FINAL RALLY

And Planters Addressed By
Messrs. Ewing and Radford.

The membership of the Stewart
County branch of the Planters' Pro-
tective Association held their final
rally for this year at Big Rock Sat-
urday. It has been decided that un-
less enough independent growers
come in to assure the organization of
controlling the majority of the pres-
ent crop to disband, so the call reads.
Felix G. Ewing, "the father of the
Planters' Protective Association,"
delivered the principal address. W.
W. Radford, another official of the
organization, also spoke. Two brass
bands furnished music. A free din-
ner was given.

Ban On Crime Pictures.

New Orleans, Aug. 12.—Officials
of the Louisiana Federation of Catho-
lic Societies have drafted, for intro-
duction in the city council, an ordi-
nance to prohibit the depiction in
motion pictures of crimes, criminals
or of any subject having to do with
criminals, their haunts and their
practices. Immoral pictures would
also be put under the ban.

SEVEN SHOTS AND LIVING.

Ulus Jameson Empty Revol-
ver Into The Body Of Bud
Wilson.

JAMESON STILL AT LARGE

Negroes Said to Have Had Pre-
vious Difficulty About A
Woman.

What may prove to be a murder is
causing the Sheriff and his deputies
to do some strenuous work to find
a negro by the name of Ulus Jame-
son, who shot another colored man,
Bud Wilson, near the corner of Sixth
and Virginia streets last Saturday.
The particulars of the affair, which
we cannot vouch for in full, were ob-
tained from a negro man, and we
give them as they were related to
us. Our informant says that Jame-
son and Wilson not long since had
a difficulty about a woman and that
Wilson had barely got out of the
way before being shot. Saturday it
is said, Jameson who lives near Pem-
broke, came to town and coming up
on Wilson opened fire without a
word. Drawing an automatic
pistol he put seven shots into him.
After having, as he thought, fixed
Wilson for another abiding place, he
made good use of his legs and had not
been apprehended yesterday though
the Sheriff and his deputies have
been constantly on the go since the
shooting.

Dr. Duncan, colored, who took
charge of Wilson after he had been
shot, did not think that he could live
but a few minutes, but when he was
seen yesterday he said that his pa-
tient had a chance of recovering.
He said that the most dangerous of
the seven shots received was the one
that entered under the left shoulder
from behind, ranging as he thought
downward, though he had not been
able to locate the ball. Another
dangerous shot was one that took
effect in the right breast.

Not a Joker.

The requirement of the 25 per cent in each precinct is not a part of the county unit law proper, but of the general local option law enacted in 1894—twelve years before the Cammack county unit law was enacted, eighteen years before our present law. The local option law is as follows:

"Upon application, by written petition, signed by a number of legal voters in each precinct of the territory to be affected, equal to twenty-five per cent of the votes cast in each of said precincts at the last preceding general election, etc."

The present county unit law does not differ in a single word or even a letter from the Cammack law, except by the removal from the law of the following: "Except that cities of the first, second, third and fourth class may not hold an election on the same day on which an election for the entire county is held," which makes it to apply to all counties in the state alike.

Almost Lost His Life.

S. A. Sud, of Mason, Mich., will never forget his terrible exposure to a merciless storm. "It gave me a dreadful cold," he writes, "that caused severe pains in my chest, so it was hard for me to breathe. A neighbor gave me several doses of Dr. King's New Discovery which brought great relief. The doctor said I was on the verge of pneumonia, but to continue with the Discovery. I did so and two bottles completely cured me." Use only this quick, safe, reliable medicine for coughs, colds, or any throat or lung trouble. Price 50c and \$1.00 Trial bottle free. STANLEY STILL

AFTER BIG BUGS.

Kentucky Congressman Tells the Story of U. S. Steel as the Probe Disclosed It.

Washington, Aug. 9.—The absolute divorce of the ownership of railroads and industrial organizations was declared by Representative Stanley, of Kentucky, in the house as the one preventive of such a monopoly as he described the United States Steel corporation to be.

Mr. Stanley spoke for an hour and a half, revising the work of the special committee which investigated the steel trust for several months.

The speech was a review of the report which was recently submitted for the majority of the committee. It was an elaborate excoriation of J. P. Morgan, John D. Rockefeller and others who have figured in financing the steel industry. Mr. Stanley was frequently interrupted and several of his assertions of facts were challenged by Representative Gardner, of Massachusetts, republican, who prepared the minority report in opposition to the majority report.

The Kentucky representative reviewed the story of John D. Rockefeller's acquisition of the Mesaba iron ore range. He told picturesquely of the manner in which Mr. Rockefeller's almoner, the Rev. Dr. Gates, conducted the negotiations with the Merritt brothers, discoverers of the range. He asserted that \$400,000 was the price which Rockefeller paid for property which he afterwards sold for \$80,000,000 for stock in a steel corporation.

The holding company and the protective tariff were pointed as the bulwarks of the steel trust's strength. The holding company was described as "a pernicious device," and the formation of the steel trust by Mr. Morgan was termed "a scheme that exceeded the dream of the most avaricious schemer that ever lived."

Mr. Stanley declared that the steel trust levied a tax on every man, woman and child in the United States.

Shocking Sounds

In the earth are sometimes heard before the terrible earthquake, that warn of the coming peril. Nature's warnings are kind. That dull pain or ache in the back warns you the kidneys need attention if you would escape those dangerous maladies, Dropsy, Diabetes or Bright's disease. Take Electric Bitters at once and see backache fly and all your best feelings return. "My son received great benefit from their use for kidney and bladder trouble," writes Peter Bondy, South Rockwood, Mich., "It is certainly a great kidney medicine." is the one magazine that not only entertains in a fascinating manner, but which also instructs. It is the magazine for the busy business man, or for the person who wants to lull away a summer's afternoon, and be agreeably informed at the same time. It is profusely illustrated, and tells in a simple and interesting way of the discoveries of scientists, the achievements of inventors, the feats of engineers and explorers, and the opening of every new field of human endeavor. What Jack London says:—"I have just chanced upon my first copy of TECHNICAL WORLD MAGAZINE. There isn't anything like it. I want more, and I cannot wait for them to come, so I am sending you herewith check for which please enter my subscription and send me immediately the last two years' back numbers."

Third—
A Fine Atlas

This one is just off the presses. This is the year to obtain a new atlas. The 1910 Census has just been completed, this atlas contains the official figures. 128 pages of 3 color maps brought right down to date—every map giving the results of the most recent surveys. All railroads are shown and named and maps of all large cities are included. There are 21 double page maps showing in detail portions of the U. S. and Canada. Dimensions 10 1/2 x 13 1/2. Bound in stiff linen—Silver Leaf Title—printed on heavy plate paper. Sells regularly for \$3.00. A splendid gift.

ALL THREE
Only \$3.80

Special arrangement with Technical World Magazine and the publishers of this Atlas make this offer possible. But it is very strictly limited. You must act immediately.

"Animated Newspaper" of French Moving Picture Shows Are Popular With the Patrons.

The "animated newspaper" issued by a French firm for display in moving picture establishments is said to be the most costly newspaper issued, from the standpoint of the subscriber, as one of these reels costs many dollars. These films are very popular with a certain class of patrons of the "movies." They are edited in much the same manner as the typical newspaper. A corps of operators is kept in constant touch with many sources of news. As soon as a promising tip reaches him, the editor sends one, two or as many men as he thinks necessary for the purpose. Frequently the three films are patched together to make one complete reel. Correspondents are maintained at different points, and these are assigned by telegraph to go to certain points where their services may be needed. Mine explosions and railroad accidents are regarded as particularly attractive features, and men are sent at once to these whenever they are reasonably accessible. Pictures of the debris and the work of removal are always objects of interest to patrons of the "movies."

Investigation Shows Communication of Tuberculosis by Use of Telephones Is Unlikely.

An investigation made in England to determine the possibility of the communication of tuberculosis through the use of telephones seems to show that such infection is practically impossible. The experiments were ordered by the postmaster general, who appointed Dr. H. Spitta of St. George's hospital, London, and bacteriologist to the king, to make the experiments.

A number of telephones, which had been in use in busy London offices for various periods, and had received no cleansing treatment other than that normally given such phones, were first tested. Washings were prepared from the mouthpieces and tests were made by the inoculation of guinea-pigs to ascertain whether tubercle bacilli were present. The mouthpieces were shown to be free from these bacilli. —Popular Mechanics.

The Italians resort to a very simple method when they wish to obliterate the injurious effects of salt air and sunshine after a visit to their villas, the shore of the Adriatic, the Tyrrhenian sea or the lakes. They bathe the face with the white of an egg, well beaten, let it dry on the skin and rinse it off in soft water after fifteen minutes. The treatment is repeated three or four times, and always at night just before retiring.

The Charger at the Funeral. The charger led at the funeral of a cavalry officer is a relic of the custom when a horse was sacrificed at the grave. An officer led the charger behind the bier to the brink of the grave and it was there slain and thrown upon the coffin. The last occurrence of this kind took place at Treves, Germany, in 1781.

CIRCLING THE EARTH ON FOOT

Remarkable Party of Travelers Who Are on a Tour of Study and Research.

About a dozen well-to-do Germans, followers of the "simple life," and consisting of naturalists and their wives, a well-known writer, who acts as leader, and a photographer, arrived recently at the Buddhist monastery at Lausanne, Switzerland. They came from Leipzig, and are on a tour round the world on foot (several on bare feet), which they hope to accomplish "within five or six years." Their motto is taken from Heine: "God gave us two legs to walk with, and if he had wished us to be the slaves of the soil, one leg would have sufficed." The "simple life" devotees, who are all teetotalers and vegetarians, have undertaken this journey across three continents with a view to studying the religions and customs of the different countries, through which they pass. From Switzerland they go to Italy, Austria, Turkey, Asia Minor, Persia, India, Tibet, China, Japan and North America, returning by boat to Spain, whence they go to Lapland, returning eventually to Germany. All the travelers are in the best of health, and very enthusiastic over their plans.

IN OTHER WORDS

Irvington Boothlette—Base ingrate! You were dead-headed into the theater last night, and I am told you said the play was rotten!

Reporter (Muggstown Bazoo)—No, I said the play was a little more than a mellow drama!

ADEQUATE AMMUNITION.

Finley Peter Dunne, creator of Mr. Dooley, was dining with a friend at a New York restaurant. Rice birds were served. The tiny cadavers, picked and lean, were brought in upon large slices of toast. "Poor little things!" said the host. "Seems a shame to kill 'em—doesn't it? How do you suppose they ever murder enough rice birds to make a mess?"

Dunne turned over an infinitesimal specimen with a fork. "I don't know," he said, "unless they use insect powder!"—Saturday Evening Post.

ANOTHER SWINDLE.

Farmer Hayseed—No, I don't want any more labor savin' machines. I've tried enough of 'em. Look in there. That's a typewritin' machine my wife spent all her egg money to git for me, 'cause I ain't very handy with the pen. Just look at the swindle.

Agent—What's the matter with it?
Farmer Hayseed—Matter? Why, you can't even write y'r name with the thing unless you know how to play a church organ.

A DEAD TOWN.

"Yes; I visited Pompeii."
"Deadest town you ever saw, I'll bet."

MYSTERY IN RUN OF TIDES

Man Has Never Been Able to Learn All the Reasons for the Currents of the Ocean.

The townsman whose acquaintance with the silvery sea is usually confined to that made during his summer holidays finds the question of the tides most puzzling. He knows that the tides rise and fall twice in twenty-four hours, and that they are affected by the moon, and there his knowledge ends.

As a matter of fact, tides vary considerably. Round about our own coasts are to be found some of the most terrible and dangerous tidal races and currents in the world; they are due to the presence of so much narrow, broken land.

Out in the open ocean the speed of the waves is amazing, but nearer land tides travel far more slowly. Down south the attraction of the moon raises an enormous wave that courses round the world from Cape Horn to the Cape of Good Hope, unbroken by intervening land.

Off the west coast of Scotland there is a whirlpool known as the "Caldron of the Spotted Seas," where the tide races at the speed of a mountain torrent. On the River Amazon, again, the tide forms a moving wall of water thirty feet high, and reaching from bank to bank as it rushes inland from the ocean.

CATERPILLAR CRUSADE IN CANADA.

Archbishop Bruchesi will enlist the members of the Catholic church of the province in a crusade against the pest caterpillar. Owing to the prevalence of wet weather this year there are on unusually large number of these pests in the fruit trees throughout the province.

The archbishop is greatly interested in fruit culture, and when his attention was drawn to the presence of the caterpillars he issued instructions to the clergy to have their parishioners take immediate steps to destroy nests. Attention to the matter now will mean the saving of the fruit crop.—Montreal Correspondence Toronto Globe.

SLANDER.

"The summer girl is too villainously traduced."

The speaker was Mayor Bacharach of Atlantic City. With a smile he continued:

"The summer girl, as a matter of fact, is as reserved and cultured as the winter girl. Why, then, these silly yarns about her?"

"Only the other day an Atlantic avenue book seller told me with a chuckle that a summer girl had come into his shop to buy Virgil's 'Aeneid.' He asked her what on earth she wanted with such a heavy book as that. She answered that it began with the words, 'Arms and the man,' and so she thought it ought to be awfully thrilling."

THRIFTY.

"I don't believe you ever did anything in your life by way of provision for a rainy day."

"You're dead wrong there. I always get a rain check for the ball game."

THE COOLEST SUMMER

Unprecedented Low Temperature Thus Far.

"A YEAR WITHOUT SUMMER."

Indiana Negroes Are Looking For "The Judgment Day."

Away back, probably 80 years, it has been said, there was "a year without a summer." A lady of this city stated a few weeks back that she had a record that has been handed down from generation to generation that would prove that such a year had been experienced.

There is no question but that this has been a year different in many respects from any ever known by the people. It is not necessary to go much into detail. Let us just compare the temperature with that of last summer. As a man stated not longer than last Saturday, there has already been no really warm weather. The government thermometer shows that only once or twice did the mercury reach the hundred mark, and there has not been a heated term of long continuance. We are now in the middle of August, and during the month that the hottest weather is expected, thus far people having been sleeping under cover. How was it last year?

As to the year 1910, it was unanimously voted the hottest ever known, the mercury for three months cavorting around between the 90 and 100 degree marks, never getting for two months lower than about 80 at night. We are writing from memory, but so confident of being correct are we that we have not taken the trouble to look up the records, but they can be found.

One of our citizens remarked the other day, while talking about the weather, "There is no use going to the seashore this year to keep cool, it's just as cool here as anybody should want it to be." A lady who is at Bethel College for the summer said that she had never experienced such delightful summer weather in her life. She said she had to use a comfort or two on her bed every night.

The Evansville Courier of the 10th inst had this, in part to say about what the colored people over there think of the unseasonably cool summer:

That the present cold summer weather is a Biblical prediction and is a forerunner of the end of the world, is a belief which has spread through Baptist and other negro quarters in the city.

The queer weather with its chilly mornings and afternoons when even a healthy negro hardly dares lie down on the levee to sleep, started discussion and a Bible student pointed out the verse predicting the end of the world, which would be preceded by a time when men could not tell the summer from the winter.

That started the end of the world rumor and it has become a conviction with dozens. You can hear negro bootblacks and coachmen and kitchen boys discussing it as they work.

There is said to be a big increase in church attendance.

During the month of August of the period mentioned in the first paragraph it is said that snow fell, ice formed and corn was frozen. Of course that beats this year "a whole block." Taking weather conditions as a whole 1912 is a record-breaker within the memory of the oldest inhabitant.

Don't buy a Range from a peddler when you can get a far better one at home for \$10.00 less money.

ONE THOUSAND DOLLAR STAKE

Is The Big Feature of the Horse Show At Kentucky State Fair In September

FAMOUS HORSES WILL BE SEEN

This Big Event is for Five-Gaited Saddle Horses Under Three Years Old—Thirteen Nominations Have Been Made.

The horse show, as usual, will be a feature at the Kentucky State Fair this year. The list of events to be decided during the week of the fair is headed by the \$1,000 stake for five-gaited saddle horses, three-year-olds and over, entries to which closed July 1. With the exception of one other stake of the same value this is the richest saddle horse stake to be contested in America this year and because of this fact the entries closed July 1 with thirteen nominations, the largest number ever entered for this stake. Of the thirteen nominations made they represent eleven owners and it is certain that at least eleven will be shown in the big stake, which will be decided Friday night of the fair. Among those who nominated in the rich prize are Powhattan Woolridge, Louisville, one entry; P. W. Ray, Bowling Green, two entries; The Undulata Farm of Col. Harry Weissinger of Shelbyville, two entries; Ball Brothers, Versailles, one entry; Collins & Redmond and Alie G. Jones, North Middletown, one entry each; J. L. Nichol & Son, Woodburn, one entry; Mrs. Richard Tasker Lowndes, Danville, one entry; Robert E. Moreland, Lexington; Hickman & Ormsby, Louisville, and Matlack & Shropshire, Winchester, one entry each.

While the horses to be shown will not be named until September 1st, the list of eligibles include such star performers as Kentucky's Choice, Nicol Plate, Maud King, Roosevelt, Nazima, Undulata Chief, Major Dare, Sadie Macey, Hazel Dawn, Rexall Prince, Princess V, and others of equal merit.

While the entries to the big stake closed July 1 with thirteen nominations the nominators did not have to make known the name of their starters in the race until the night of September 1, thirteen days in advance of the date of the stake, and previous to that time nominators have the privilege of disposing of their nominations to other owners. With this condition it is expected that several of the prominent saddle horse owners of the East will take advantage of an opportunity of purchasing a nomination from one of those who have made two nominations to the stake with a view of getting their horses in the stake. In fact should any owner decide before September 1 that his eligible was not in condition to compete for the stake he will have an opportunity of disposing of his nomination to another, and as many of the most famous saddlers each season are usually developed between July 1 and September 1 it is certain the \$1,000 stake will be contested for by the best in the country.

Other events for three and five-gaited saddle horses as well as for light harness horses insure the horse show at the State Fair this year will prove one of the greatest attractions in the history of the fair.

RICH PRIZE FOR BOY

Who Wins the Judging Contest at the Kentucky State Fair Sept. 9-14.

With a view of further encouragement to the farmer boys of Kentucky to gain a scientific knowledge of agriculture the State Fair management has again this year made arrangements for a renewal of the Students' Judging Contest, which has proved so popular in the past, and a scholarship in the agricultural college of the State University, carrying with it \$100 in cash, will be offered for the best judge of several classes. The contest will consist of rings for horses, cattle, sheep and swine exhibited at the State Fair and written statements are to be presented by each contestant setting forth his reasons for the decisions reached by him.

The contest this year will be under the personal supervision of Prof. J. J. Hooper, Professor of Animal Husbandry of the Kentucky State University at Lexington, and it is his purpose to devote much of his time from now until the date of the fair in working up interest among the farmer boys of the state in the event. Inasmuch as the farmer boys of Kentucky are proud of their ability to correctly judge a horse or other farm animal, much interest is always manifested in this contest and as many applications for entry blanks have been received by Secretary Dent this year it is expected that keen rivalry will exist among several hundred young men and boys the week of the fair, September 9-13. Any boy who wishes to enter the contest can secure an application blank by applying to J. L. Dent, Secretary of the State Fair, Room 320, Paul Jones Building, Louisville, and all information relative to the contest will be forwarded to the applicant with the entry blank.

UNABLE TO SEE ANY HOPE

Eleventh Hour Had Passed and There Was No Consolation for the Sorrowing Wife.

An old minister in South Wales told a story once to Pastor Thomas of the Washington Avenue Congregational church which illustrates the verity of the saying that it is folly to be wise where so much consolation can be gained from ignorance, says the Columbus (Ohio) Dispatch.

The preacher told him, "I was called to visit an old woman very illiterate and ignorant of spiritual things, a short time after the death of her husband, who was noted for his learning, his enmity to the Christian ministers and his capacity for drink.

"Fearfully she told me that it was not his loss, but his unpreparedness for death that so concerned her. Then I called her attention to the thief who obtained forgiveness on the cross at the eleventh hour, after he had sincerely repented.

"Possibly," I said, "your husband had mercy and forgiveness at the eleventh hour."

"The old woman paused in her weeping, looked at an old clock in the corner, hesitated, and then said in a broken-hearted tone, 'That's the trouble, Mr. Jones, it was after twelve on that clock when he died and it was only fifteen minutes fast. I wish now that it had been an hour ahead of time. Then there might have been some hope.'"

BIRD MIGRATION.

The rate at which some birds can migrate under favorable conditions is extraordinary, and as one listens to their plaintive cries coming from the darkness overhead it is difficult to realize that in a few hours these same birds may be within the arctic circle and little later may be even crossing the pole itself. . . . Less is known of the actual dates of the departure of the migratory birds in autumn than of those of their arrival earlier in the year, and this for obvious reasons. The way in which our most charming songsters silently skulk out of the country in the autumn is very different from that in which they make their triumphant entry in the spring when every wood and copse resounds with their melodies.—Windsor Magazine.

HIS IMPRESSIONS.

C. E. Fosdick, secretary of the Automobile club, was complaining in New York about the scarcity of good inns and hotels to be found on country automobile trips.

"I met a man the other day," he said, "who had just returned, brown and rather thin, from a long tour through the remoter parts of the middle west.

"Well, what impressed you most on your trip?" I asked. "The scenery? The resources?"

"No; the tough beefsteaks," he answered, "the canned vegetables, stale eggs, strongish butter, exorbitant bills and disobliging waiters."

MIGHT BE WORSE.

"Well," remarked the scientist, "this political controversy is pretty severe, but I suppose it might be worse."

"How?"

"Why, they might try to bring up that argument about who discovered the north pole."

REAL PITY.

"Miss Prim lost her temper yesterday."

"Heaven help the unfortunate who finds it."

CONFIRMED PROOF

Residents of Hopkinsville Cannot Doubt What Has Been Twice Proved.

In gratitude for complete relief from aches and pains of bad backs—from distressing kidney ills—thousands have publicly recommended Doan's Kidney Pills. Residents of this vicinity who so testified years ago, now say the results were permanent. This testimony doubly proves the worth of Doan's Kidney Pills to Hopkinsville kidney sufferers.

John Franklin, Earlington, Ky., says, "I have had no occasion to use Doan's Kidney Pills nor any other kidney remedy since this preparation cured me some years ago. You are at liberty to use my testimonial as heretofore. I had pains in the small of my back when stooping or lifting and I became tired easily. I also had dizzy spells and had to get up at night to pass the kidney secretions. Doan's Kidney Pills proved their merits by relieving me."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

IS OLDEST OF LIGHTHOUSES

Fire Tower at La Coruna, in Northern Spain, Probably Was Erected by Trajan.

At La Coruna, in northern Spain, may be seen a fire tower which is, with the exception of the ruins of the Roman lighthouse at Dover, England, the oldest of all existing structures of this kind. The exact date of the erection of this tower is unknown. According to an ancient tradition, it is accredited to Hercules, whence its name, Torre de Hercules. Others say that Phoenicians who had established several colonies in Spain, had erected this light tower for their northland cruises. However, judging from the inscription, it is more probable that the Roman emperor Trajan (98 to 117 A. D.) erected this structure. The inscription also mentions the name of Servius Sulpus of Lusitania as the architect. The tower is built of ashlar and is nine meters square and forty meters in height. It has six separate stories which can only be reached by a circular staircase around the exterior of the tower. The lighthouse was restored in 1684, but at the end of the eighteenth century was again in ruins. In 1797 it was rebuilt by the Spanish government, and still sends forth its beams.

"I suffered habitually from constipation. Doan's Regulax relieved and strengthened the bowels so that they have been regular ever since."—E. Davis, Grocer, Sulphur Springs, Texas.

COMPLIMENTS FOR THE BRIDE.

I must relate a striking salutation that the bridal couple received from a Quaker client of mine, a shrewd dry goods merchant. Presented by an usher he surveyed the bride, whom he had never seen before, and then with the utmost deliberation proceeded to say:

"William, I think the bride has shown more judgment in her choice than thee has."

Fortunately before I could turn to resent this strange salutation he continued as follows:

"Because it takes some penetration to discover thy good qualities, but hers can be seen at a glance."—A Retrospect of Forty Years.

A Matter of Assurance.

"Some of your speeches," said the cynical friend, "make me think of a mathematical marvel I once knew." "In what way?" "He would dispose offhand of any problem you gave him. Nobody in the crowd was able to say whether he got the right answer, and it really didn't seem to make much difference, anyhow."

CANNOT ENDURE THE PIANO

Chinese Servant Gives Notice When Employer's Daughter Gets Old Enough to Practice.

The fascination of an untrammelled life in New York had lured other Chinese servants away from western families who had migrated with their retinue to New York, but John of the banker's family had remained faithful through two years of metropolitan temptations.

At last he gave notice and refused to tell why. Finally the manager of an employment agency offered a solution of John's defection.

"It is because your little girl has got big enough to practice on the piano," he said. "John can't stand that."

"A Chinaman hates a piano. It takes a good deal to upset Chinese nerves, but a piano is capable of completing the job most effectually. Herefore there has been but little piano playing in your house; now that there is a prospect of several hours of practice every day John clears out."

"We have that trouble with many Chinese servants. There are plenty of western families in New York who would like Chinese help, but as soon as an otherwise willing servant learns that there is a piano in the house he declines the job."

FOR DISINFECTION OF BOOKS

Apparatus Devised by a Frenchman Removes Danger of Contagion and Doesn't Damage Paper.

The danger from contagion from books that have been in the hands of persons suffering from various diseases has led to the invention of various methods of disinfection, of which none appears to be more effective than an apparatus devised by Marsoulan of Paris.

His process embraces two parts. In the first place, the books are placed in a "beater" where a strong current of air opens every leaf and an aspirator sucks out the dust and deposits it in aseptic water; then they are suspended in a disinfectant, the covers being bent back and held by clips so that the leaves are widely opened and placed over a heater which for a time subjects them to a temperature of 167 degrees Fahrenheit. The paper is not damaged, and the efficiency of the process is said to have been demonstrated beyond question.—Harper's Weekly.

Inscrutable Way of Providence.

With reference to the final extinction of the latter day successor of the Delmonico restaurant, it is related that two Germans, fresh from Chicago, once visited New York, and one well acquainted with the city invited his friend to dine at Delmonico's, where a dinner for two and a bottle of wine were ordered. The place and fare were praised until the bill of \$11 was presented. This they considered an extortion.

They paid, however, and while walking down Broadway the excited German commenced to swear at the supposed extortion. His friend then said:

"Do not swear, Yawcop. It is wicked to swear. God has punished that man Delmonico."

"How?"

"I haf mine pocket full mit shpoons."

The Intruder.

A certain boat coming up the Mississippi one day during the flood lost her way and bumped up against a frame house. She hadn't more than touched it before an old darkey rammed his head up through a hole in the roof, where the chimney once came out, and yelled at the captain on the roof: "Whar's yer gwine wid dat boat? Can't you see nothin'?" First thing yer knows yer gwine to turn dis house ober, spill de old woman an' de chillen out in de flood an' drown 'em. What yer doin' out here in de country wid yer boat, anyhow? Go on back yander froo de co'n fields an' get back into de ribber whar ye b'longs. Ain't got no business sev'n miles out in de country foolin' roun' people's houses now?" And she backed out.—Life.

Hints to Lovelorn Gents.

If she makes a practice of eating onions for supper every time you call, it is a sign that she is indifferent toward your suit.

If you spend a lot of money sending flowers to her every day it may make a hit with her, but she will marry somebody who has more sense.

Don't talk to her about love in a cottage. Talk about a brownstone bungalow and spring the cottage on her after you get her.

If she is handsome, tell her about it, and if she isn't, tell her anyway.

Have an automobile catalogue in your coat pocket where she can catch a glimpse of it.

Blackbirds' Courage.

At Heriot Gardens, a new and pretty suburb of Burntisland, a cat upon a garden wall was about to pounce upon a female blackbird sitting on her nest of eggs, when her mate, which was on the watch, sounded the alarm.

Acting together, both set upon the cat with a vigor that hustled it off the wall into a neighboring garden. The birds pursued it along the path, keeping at close quarters till it escaped under cover. Victory was complete, and the enemy has not approached the place since.—London Globe.

The Latest Machine Invented

The Prosperity Collar Moulder is and has been in use at Hopkinsville Steam Laundry for two months. The machine spoken of will eliminate broken edges on fold collars, gives space for tie to slide, and collar with nice oval edge looks better and feels better than the saw edge kind. We have exclusive use of said Machine in Hopkinsville.

Our shirts are encased in sanitary Protex cover which costs more, but looks better and keeps in nicer shape than other methods, but customer pays no more than for other work. Get in line, buy a \$5 book and help The Avalon along. Metcalfe will appreciate your assistance in a worthy cause for Hopkinsville and surrounding country.

A FINE LINE OF COPY-RIGHTED ART CALENDARS.

The plans for your advertising campaign this year should by all means include a handsome Art Advertising Calendar for 1913. We have secured the exclusive agency for the Copyrighted Calendars produced by the A. M. Collins Mfg. Co., of Philadelphia.

This is one of the largest and most substantial Calendar houses in the United States, and the quality of their line is superior to that of any ever shown in this section.

This line will be handled exclusively by us in Christian and Trigg counties. It includes a great number and variety of subjects in full color, as well as some hand colored pictures of exceptional beauty.

The samples for 1913 will be in our hands shortly, and we shall be glad to show them to you at an early date. **MAKE NO PLANS FOR YOUR 1913 CALENDAR UNTIL YOU SEE THIS EXTRAORDINARY LINE. HOPKINSVILLE KENTUCKIAN.**

SHOULD BE SIMMERED

BOILING CHICKEN IS A GASTRO-
NOMIC ERROR.

Fowl Always Should Be Rubbed With
Lemon Before Cooking—Mistake
to Salt the Water to
Start With.

Our most scientific cooks say that the way to boil an egg is not to boil it. Paradoxically, we may say the same thing about a chicken, for the way to boil a chicken is not to boil it, but to simmer it.

In nine cases out of ten in cooking, the lesser fire does the better work, and this is especially true in the boiling of all meats. They must be boiled very, very slowly, which is the same thing as saying they must be simmered.

Any ancient bird can be simmered until the meat will part from the bones, but any young chicken can be boiled as tough as the proverbial old hen—the meat clinging to the bones and seeming to be all bone and tendon.

The best way to start the prepared chicken is to pour boiling water over it, let it boil up for a few brief minutes—five is usually about all it will stand—then lessen the fire. Skim and keep covered while cooking.

Do not salt the water to start with, as our old-fashioned recipes told us to do. Put the salt in when the chicken is half done. A good cook with the knack can do almost anything in this way, and spoil neither the broth nor the bouilli, but there are others who must follow rules to the letter.

To insure greater tenderness, some cooks rub their boiling chicken with a lemon before putting it on to cook. Others put a tablespoon or two of vinegar into the water. Neither of these things do any harm, and either may lessen any rank quality present. But they are not absolutely necessary to the securing of a tender product.

Notice that it is the pot for boiling rather than the stewpan. There is just as much difference in the boiling of things in a thick iron pot, which holds the heat and distributes even gas heat, as between the thin bottomed frying pan and one thick bottomed. For very quick cooking the thin-bottomed frying pan is out of the question, as we know, because a meat will burn so quickly in it.

We have a greater number of uses for cold chicken in summer than in winter, and, by the way, it is generally better to let our chicken cool in the liquor in which it was cooked and stay in it until we are ready to use it.

If there is one thing more than another concerning which tastes differ, it is in the making of this salad. The amount of celery used varies from one-third as much as chicken to one and a half times as much celery as meat. Equal parts of chicken, celery and cabbage are sometimes used, and the dressings are legion, from the expensive mayonnaise to the inexpensive boiled dressings. The salad may also be garnished to suit the taste. Some of the older garnishes were boiled beets and hard boiled eggs, which a Japanese cook will turn into roses, tulips and some quite unidentifiable blossoms, plus checker work and various parquetry.

Washing Cretonne.

Bran water is excellent for washing cretonne, and this is the way to make it: Take one cupful of bran, put it into a saucepan and cover it with one quart of cold water, then bring it slowly to the boil. It should be left to simmer for half an hour, and then be strained through a piece of muslin, after which add another quart of water to make it lukewarm and also a little melted soap. Less soap is necessary than for ordinary water, as bran water has cleansing properties. It has also a stiffening power, and thus no starch is required to stiffen the majority of fabrics for which bran water is used.

Cantaloupe Bavarian Cream.

Cover one-half box of gelatine with one-half cup of cold water and let stand for one-half hour; dissolve over hot water. Whip one pint of cream to a stiff froth, turn into a basin, add one-half cup of pulverized sugar, a pinch of salt, a teaspoon vanilla, one tablespoon sherry and the gelatine. Stir from the bottom toward the top until it begins to foam a little, add ¼ cup chopped candied fruit and continue stirring until the cream forms. Turn into a mold previously wet with cold water and stand away to harden. Serve with lady fingers.

Entire Wheat Doughnuts.

One cup sugar, 2½ tablespoons butter, 2 eggs, 1 cup milk, 4 teaspoons baking powder, ¼ teaspoon cinnamon, ¼ teaspoon nutmeg, 1½ teaspoons salt, entire wheat flour enough to roll. Cream butter, add sugar, eggs beaten until light and milk; then add 3 cups of entire wheat flour sifted with the baking powder, spices and salt. If necessary add more flour to stiffen the mixture to roll. Roll ¾ inch thick, cut with doughnut cutter and fry in deep fat.

Restorative Jelly.

Put in a glass jar one-half box of gelatine, one tablespoon of granulated gum arabic, two cloves, three tablespoons sugar, two tablespoons lemon juice, one cup of port wine. Stand in a kettle of cold water, heat until all is dissolved; strain into a shallow dish, chill and cut in one-half inch squares.

Worth Weight In Gold.

Abingdon, Va.—Mrs. Jennie McCall, of this place, says, "I had been troubled with female complaints for over ten years. I could not walk or stand on my feet, and had been almost confined to the house for a long time. I began to take Cardui, the woman's tonic, and now I can walk anywhere I want to go. Cardui is worth its weight in gold." This is a high estimate on a plain, herb medicine, yet there are thousands of women who would gladly pay this price for a remedy to relieve their suffering. Cardui has helped others. Why not you? Try it. Your druggist sells it in \$1 bottles.

BUNNY BEAT THE MOTOR CAR

Rabbit Ran So Fast the Chauffeur
Had to Speed to Keep Him
in Sight.

The scene was on the road to Point Place. Illuminations were furnished by the moon and stars. Besides the rabbit and the auto there were one man and two girls, also a chauffeur. The big automobile was speeding along the highway, sending its white light ahead, when suddenly right across the path of the rays from the head lamps shot a young rabbit. The chauffeur slackened speed, hating to hurt the little creature, and then the rabbit hopped back into the center of the road again, gave one look into the blinding glare of the lamps and started the race.

Straight down the center of the smooth, white highway he shot on ahead of the car, and the chauffeur speeded up a bit just to see how fast the race was going to be, but he could not catch the rabbit, not by ten feet. That little critter's feet went so fast there did not seem to be any there, and just a speck where the long ears bobbed with the motion of his little body and a brown blur of hair.

And still he ran, on and on, keeping his distance ahead of the big machine as if the light had hypnotized him and he could not stop, while behind in the car big, lazy pursuers laughed and watched and begged the chauffeur not to run him down. There was no such chance.

The rabbit was too quick. When he was tired of the sport he hopped to one side of the road as the car went by, tipped up his tiny head and winked out of one pink eye as he looked at the speeder and its occupants with a quizzical curve of his little mouth.—Toledo Blade.

QUEER THINGS ABOUT PAIN

Patient May Feel It in Limb That Has
Been Amputated, or in
Wrong Place.

Pain sometimes behaves in a curious fashion. There was a soldier in London, after the Boer war, who complained of excruciating neuralgic pains in his right foot. This very much amused his friends, for he had lost his right leg.

The explanation was that the pain happened to be in the trunks of those nerves, which had sent branches to the foot.

Sometimes a patient comes to a doctor complaining of pain in the knee, and he is greatly surprised when the doctor tells him that the site of the affection is not the knee, but the hip. We are all familiar with the pain under the shoulder blade which comes from an afflicted liver.

The stomach, too, can produce pain in many parts of the body. A disordered stomach will give us pain as far away as the head, and when one gets a cramp in his toe, it is often due to acidity of the stomach. Swallow a pinch of soda and the cramp will disappear.

An aching tooth will produce neuralgic pains in the face, and very often a violent pain at the back of the head is due to the faraway kidneys, which themselves may suffer no pain at the time.

Power of Vegetable Growth.

A tar macadam pavement stretching from the school of gunnery at Shoeburyness (Eng.) to the sea is at present in a state of violent if silent eruption. About a fortnight ago the surface became covered with what may be called "blisters," raised a little above the common level, which attracted much wondering attention.

From each of these, in a few days, a series of cracks appeared, extending themselves in rays from a center. Finally came up a broad, soft shoot, looking extremely well pleased with itself and its work, which proved to be so old and well known a friend as the thistle. At this moment there are hundreds of those bold intruders showing defiantly through the pavement, affording a most interesting illustration of the power of vegetable growth.

Mother's Chair.

Mother's chair had rocked the whole family. It made a creaking noise as it moved, but there was music in its sound. It was just high enough to allow us children to put our heads into her lap. That was the bank where we deposited all our hurts and worries. Oh, what a chair that was. . . . It was a very wakeful chair! In the sick day of children other chairs could not keep awake—it kept easily awake. That chair knew all the old lullabies, and all those wordless songs which mothers sing to their children. Songs in which all pity and compassion and sympathetic influences are combined. That old chair has stopped rocking for a good many years. It may be set up in the loft or garret, but it holds a queenly power yet.—T. DeWitt Talmage.

Clumsy Flatterer.

He was a flatterer, but a clumsy one. Noting that the girl of his heart possessed beautiful teeth that shone like ivory, he ventured to pass a compliment.

"Dearest," he whispered, leaning over the music rack, "your teeth are like piano keys."

Freezing him with an icy glare, she turned on her heel. "Sir, how dare you insult me?"

"Insult you?"

"Yes, insinuate that my teeth are as large as piano keys." And without another word she left the parlor, leaving him crestfallen and bewildered.

Ollie's Wit.

The remarks attributed to Ollie James has more wit in it than derision. T. R. isn't a bull moose, he says, but a bull loose, and the Republican party is the china shop. To which it might be added that the china shop has always been operated jointly by the Republican and Democratic bosses, and the smashed stock in trade will be jointly deplored.—Chicago Tribune.
